

How and What do I test? And What Do I Get in Exchange? AKA: Exhibit A

Description of Beta Test Material(s) to be Tested: “How and What”

FireGuide has two users- the **trainer (you!)** and the **trainee (your child/sibling/partner/friend)**, who performs the drills.

To begin, please fill out the short survey at: [Intro Survey](#)

As the trainer, you use the Setup Features to customize the App for your trainee.

In **Setup**, you record Notices and Drills, set the schedule for the drills based upon the Trainee’s availability, and listen to the Feedback from the Trainee.

Based upon the Feedback, you will likely need to delete drills and record new versions that incorporate your trainee’s comments.

The website (<https://www.fireguide.us/gettingstarted>) has short videos for each of these sections.

Setup

For each of these Setup Features, please comment on ease of use, problems encountered, and your recommendations for improvement at this link: [First Time Setup](#)
